CYBERTECH SERVICES

SECURING DATA & EMPOWERING THE BUSINESS

Government Past Performance

Naval Information Warfare Center (NIWC/SPAWAR)

Architected, engineered and supported network security solutions for the US Navy ships. Ensured Naval Information Assurance compliance and protection by performing control monitoring and network level vulnerability assessments. Successfully completed over 30 network system operational verification tests to support the US Naval PAC mission.

United States Secret Service (Office of the Chief Information Security Officer)

Developed certification and accreditation security packages for new systems to track vulnerabilities and threats before an Authority to Operate (ATO). Performed control assessments, managed open findings, remediations and POA&Ms in a GRC platform for each system connected to the network. Also performed tabletop exercises for cyber related incidents with Special Agents in Charge (SAIC) and documented continuity plans. Effective in reducing cyber risks and educating senior management stakeholders on potential gaps in the mission with security reporting and compliance to FISMA in a form of a security scorecard.

Army Research Laboratory (Computer Network Defense Service Provider)

Supported ARL CNDSP protecting over 500 subscribers on four separate networks (2 classified and 2 unclassified). Deployed endpoint security capabilities to each subscriber and performed continuous monitoring for cyber threats and attacks. Collaborated with other teams for security investigations and potential cyber breaches. Met service levels and created quarterly reporting and dashboards of each subscriber's security posture.

Testimonials

Global Financial Services Company

Mr. Meeting was a great asset to the team assisting the firm in standing up a cybersecurity program, making cost effective cyber investments and identifying overlap and tech debt part of a five company merger – *“Global Head of IT Strategy”*

Global Information Technology Company

Throughout the course of Arrow's Electronics Enterprise Computing Solutions Division (North America) Oracle ERP implementation, Mr. Hasan exemplified a dynamic combination of in depth cross functional operational expertise, vast knowledge of Oracle EBS functionality, and ability to architect scalable solutions for our complex business environment. With a very tight timeline, Mr. Hasan's project management and strong communication skills allowed him to work with all levels of the organization to ensure our Implementation date was met – *“Director of Business Development- Oracle Applications”*
